

## WORKSHOP PLANNING RESOURCES FOR 'ACCESS' PROJECT LEADERS

### ISSUE 1: JULY 2014

#### **1. Introducing your 'top ten' ACCESS Project planning resources:**

There are various websites, reports and documents that should be useful to you in planning your workshops. And you might like to include information about some of these in your workshop packs for participants.

We aim to update this resource list every two months, whilst keeping it to a 'manageable' number of resources for you. So you can expect issue 2 to be on the website in September.

**1.7** The term '**personalisation**' means different things to different people but, as used both by the previous Labour and current Coalition governments, it is about tailoring services to people's own circumstances and giving them more control over the amount and type of support they receive. The briefing below looks at how personalisation can increase access to healthcare for people from black and minority ethnic communities, but also considers some of the challenges that it may bring.
